

Dearest Gertie,

Monday Evening

Well here it is the end of the first day. We haven't done much in the way of work today and from now on they say it gets easier.

I told mom that your mother wanted you to go with them to dinner, and she said that she was sorry that you couldn't be with us.

Sunday night when I was getting ready to go to bed Dad came up and started talking to me about school. He said that next year I hadn't better think of driving back and forth. He asked me how I came out in Chem. I told him the straight facts and did I get a surprise when he asked if I wanted to take some other course. It ended by him telling me to inquire at Boulder and Ft. Collins about mechanical Engineering. This is rather hard to explain in a letter

but I will tell you all about it
in my next letter, or the next
time I see you. I am coming
in Wednesday night and if you
home I will tell you then. Please
don't mention this until I talk
to you as there are some facts
I don't like to write in a letter.

I hope some of the
board members don't walk in
tonight as some of the fellows
are throwing a party and it
might be embarrassing. I don't
know what is going on, but I
have an idea.

Well honey I will
have to close as it is getting
late and I still have some
work to do.

Love,

Matt.
